REMODEL YOUR SKIN
NATURALLY WITH
SKINPEN® PRECISION

What is SkinPen Precision?

SkinPen Precision is a leading skin remodeling device that creates temporary small microscopic channels in your skin.

This simple procedure activates your body's natural skin-healing power to increase collagen and elastin so your skin returns to a healthier looking and youthful appearance.

Watch your skin look more youthful and rejuvenated with SkinPen Precision.

BRING YOUR

Inner Beauty

TO THE SURFACE
WITH SKINPEN® PRECISION

**The Most Technologically-Advanced
Skin Remodeling Device**

NEW COLLAGEN... NEW YOU

HOW IT WORKS:

**Why does the media talk about collagen?
Why it is so important in medical aesthetics
and skin rejuvenation?**

Collagen and elastin are the essential protein fibers in the skin that give it support and elasticity.

As we age, those fibers break down leading to fine lines, wrinkles, sagging skin, and large pores.

Regenerating collagen and elastin can also help in getting a more youthful appearance overall.

Collagen plays a key role in scars, such as those formed from acne. Improper signals in pigmentation lead to dyschromia such as Melasma, Vitiligo and Sun or Age Spots (Solar Lentigines). Skin remodeling can have an important role in the improved appearance of these conditions.

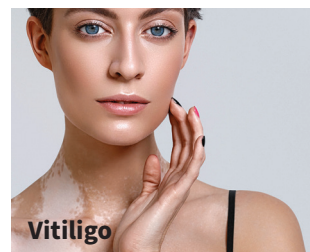

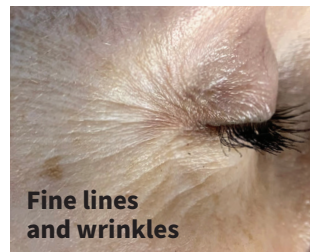

BRING OUT YOUR INNER BEAUTY

**Give your skin the youthful boost it deserves ...
natural skin rejuvenation from the inside.**

SkinPen® Precision is a microneedling device that utilizes Collagen Induction Therapy to treat acne scars and fine lines & wrinkles. SkinPen Precision is also found helpful in restoring the skin's abnormal pigmentation activity often found in skin conditions such as melasma, vitiligo and sun or age spots.

SkinPen® Precision CE Intended Use: SkinPen® Precision is a medical microneedling device and accessories, intended to be used as a treatment to improve the appearance of facial acne scars in adults aged 22 years or older and to improve the appearance of fine lines and wrinkles on the face and neck. The SkinPen Precision is also intended to treat pigmentation conditions (Dyschromia) including Melasma, Vitiligo and Solar Lentigines. Indications for SkinPen® Precision may vary based on your country.

SIMPLY ACTIVATE YOUR OWN COLLAGEN FOR MORE YOUTHFUL-LOOKING SKIN

**SkinPen® Precision is simple, comfortable,
and effective for skin rejuvenation in as little
as 30 minutes.**

WHAT YOU CAN EXPECT:

Light Numbing

Topical anesthetic is administered to assure maximum comfort during the treatment.

Simply Treat

SkinPen Precision creates thousands of controlled microchannels in the skin to elicit your body's natural wound healing cascade.

This healing process works at the site of treatment to remodel the tissue resulting in new collagen and elastin to give your skin a younger, firmer and radiant appearance.

Hydrate to Protect

The LIFT Hydrogel is applied to the treatment area to help reduce friction for easy gliding and comfort.

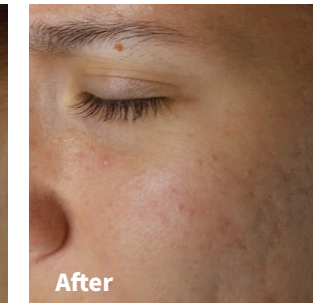

Your provider may recommend a course of procedures based on your individual goals. Maintenance of your procedure might require multiple treatments.
